

Little Judique Harbour

CHS Chart No: 4462 – St Georges Bay

Amenities: water?, power?

Harbour Authority: DFO does not list this harbour. The harbour authority is not known

Description:

We have very little information on this harbour.

The harbour entrance is located at **N45°57.52'/W61°31.73'**. The approach is very shallow: available bathymetric data indicates less than 2 feet. Depths of up to 6 feet are reported alongside the wharves.

Since it is less than 2 nm from Little Judique Ponds (Maryville) Harbour, and not far from Port Hood Harbour (Murphy Pond) it is probably best to avoid this harbour until better information becomes available.

Navigation:

A sector light is shown from a R&W daymark at the inner end of the south breakwater. The white sector (121T) indicates the preferred approach. A light (FG) is shown from the north breakwater.
